STANDARDIZED TEST SCORES

At Carden School of Fresno, we do not believe that national testing shows the full scope of a student's abilities. It is, however, a fair measure of improvement and overall performance. CSOF administers the Stanford Achievement Test Series, Tenth Edition (SAT 10) for student performance assessment.

A summary of student averages for the 2018-2019 academic year is listed below.

First Grade:	The average CSOF first grade student performed at a 2.3 (second grade, third month) grade equivalent and in the 62 nd percentile (national average).
Second Grade:	Students averaged a 2.8 grade equivalency and in the 50 th percentile.
Third Grade:	The student average was a grade equivalent of 6.7 with an 83 rd percentile rating.
Fourth Grade:	Average student performance was in the 80 th percentile with a grade equivalency of 7.5.
Fifth Grade:	The average student scored in the 80 th percentile and at a 8.3 grade equivalency.
Sixth Grade:	These students averaged in the 65 th percentile with a grade equivalency of 7.7.
Seventh Grade:	The average grade equivalent was 11.9 and students performed in the 80 th percentile.
Eighth Grade:	Our eighth graders scored at the 11.9 grade equivalency and in the 74 th percentile.

The overall average percentile ranking for the CSOF students tested in the 2018-2019 academic year is 72. As a whole school, our students scored at 2.1 grade levels above the national average.
